

CEOXiME: Theta

Theta is the final installment of original works of CEOXiME, an 8 year running project of Tatiana and hEADaCHE. Their works have appeared on over 15 compilations, reviewed in over 20 magazines; and played with such notable bands such as Pigface, Gravity Kills, gODHEAD and Mindless Faith. In the underground you would have heard of CEOXiME, or heard one of hEADaCHE's many remixes. Theta was finally picked up by one of the longest running industrial labels, *Invisible*, and released as MP3. Now you can have this *and* Vibrant Grey all on 1 CD.

Excerpts from the upcoming Darksonus interview:

So why release Theta now? Hasn't CEOXiME been dead for a couple of years?

Yes, CEOXiME ended at the end of 2005. I never felt quite complete with the project though, and I had assembled a nice final CD and delivered it to *Invisible*. I was always quite proud of this material and I wanted to see it all on CD. *Invisible* opted to only do MP3 sales of the album,

which omitted the extras that I had put with the CD - the artwork and the multimedia portion of the CD. So I thought it would be good to finally put these things together for myself and all who supported CEOXiME. All in all, it's over 2 hours of really good music, mostly originals, but also some of the best remixes from Kritikal, King Rhythm, Interface, Function13 and Christ Analogue.

What's in the multimedia portion?

The full and complete Vibrant Grey encoded in 192 kbps, the complete color artwork of Vibrant Grey, and a few surprise extras as well.
